

LEAD-ACID BATTERIES.

INSTRUCTIONS FOR PROPER USE.

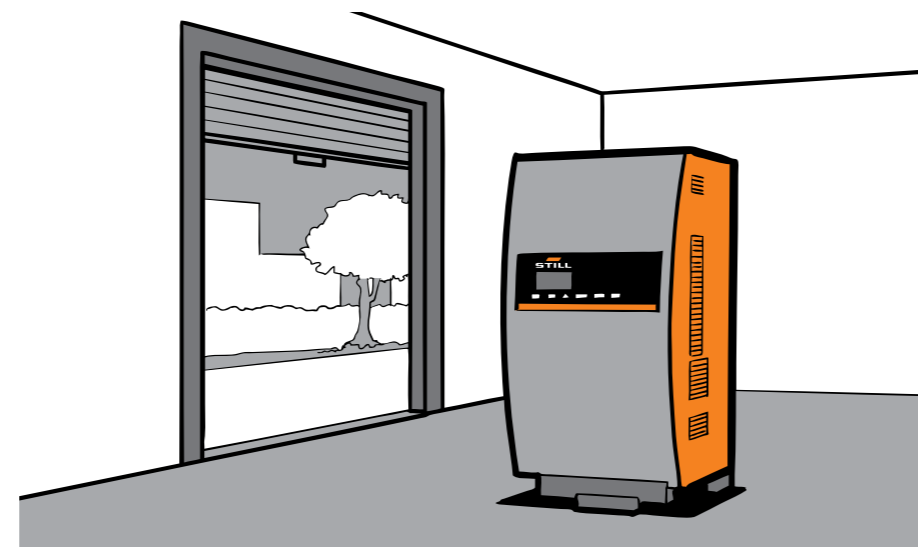

General safety and care instructions

Read and follow the instructions for use

For more information, please refer to the instructions for use.

Ensure ventilation at the charging station

Be sure to provide sufficient ventilation of the charging station.

Work in a clean and dry manner

Ensure battery surfaces remain dry and free from dirt.

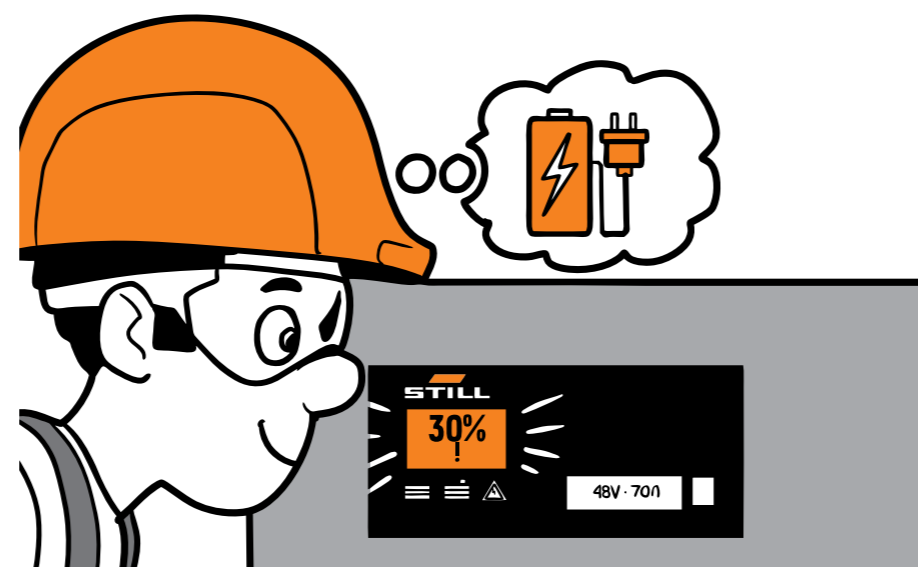

Wear protective clothing

Wear gloves and protective glasses when transporting, repairing and servicing batteries.

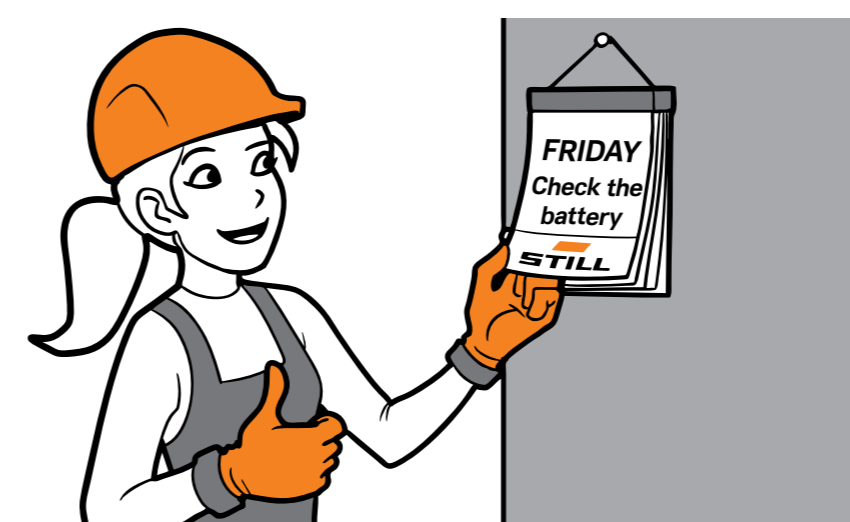

Only use distilled (demineralised) water

Only use distilled (demineralised) water to fill batteries.

Avoid total discharge

Charge the battery regularly in cycles to avoid total battery discharge.

Respect maintenance intervals

Have the drive battery and industrial truck checked regularly by STILL Service.

Have the drive battery and industrial truck checked regularly by STILL Service.

Service hotline

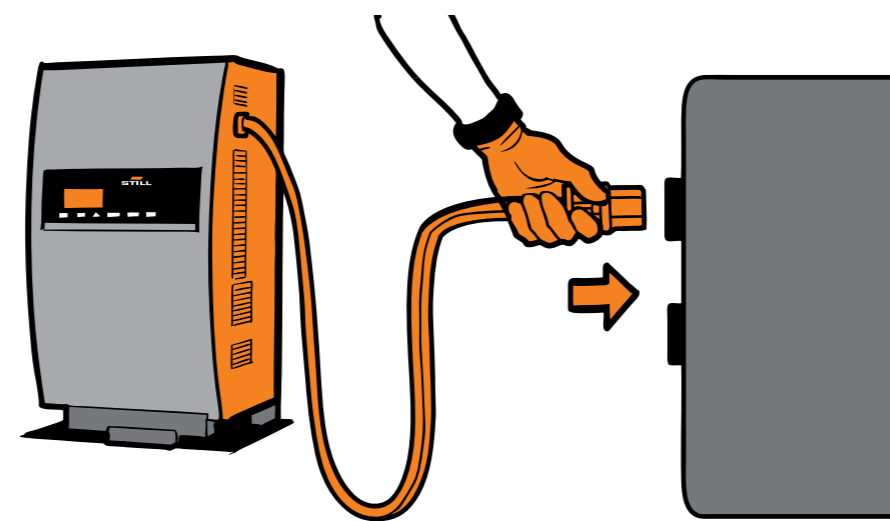

+44 345 603 6827

Proper charging

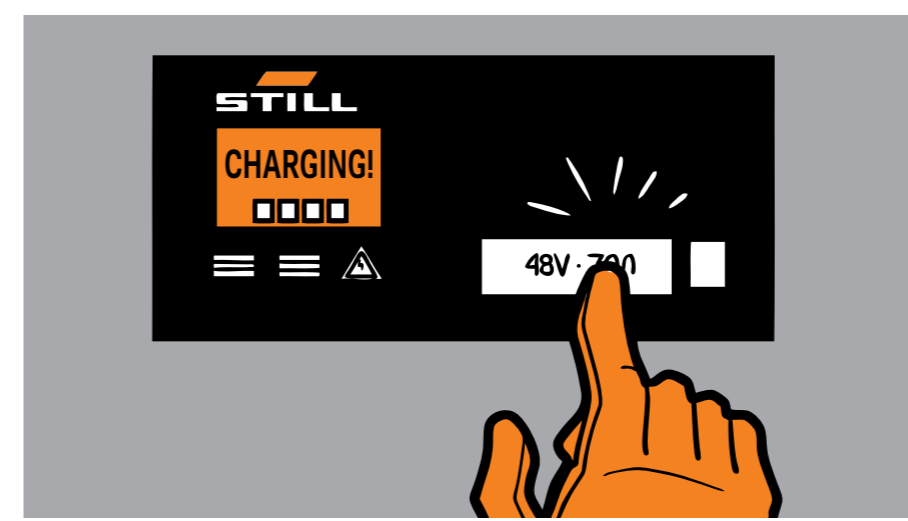

Visually check all battery components

Check the plugs and cables for all battery components and remove any metal objects from the battery – explosion and fire hazard!

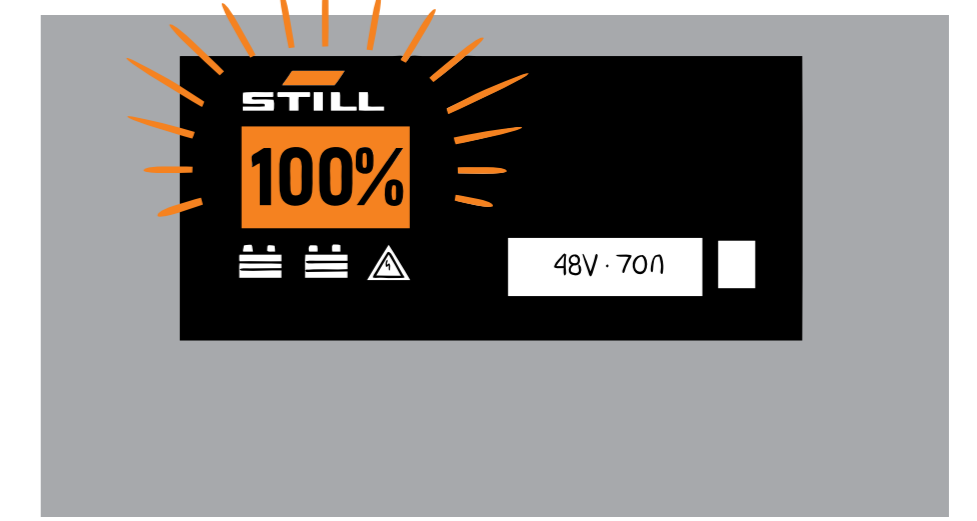

Connect battery and charger plugs

Only use the charger that has been recommended for use with the specific battery to avoid incorrect charging.

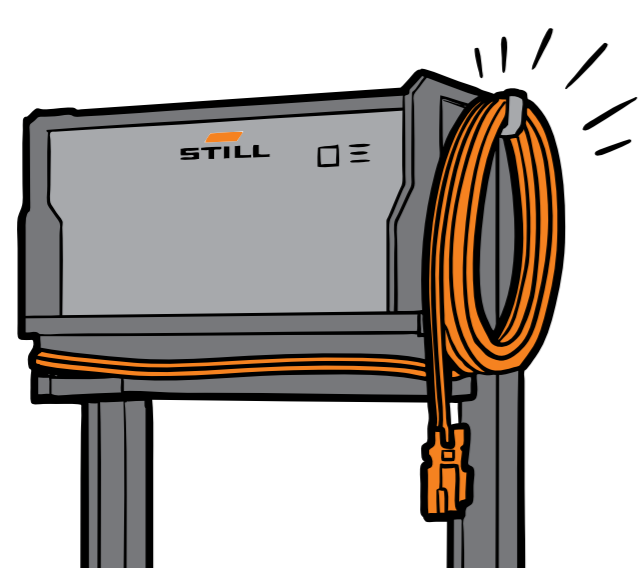

Start the charging process

Check the battery is charging properly.

Fully charge the battery

Charge the battery completely. The charger turns off automatically once the battery is fully charged.

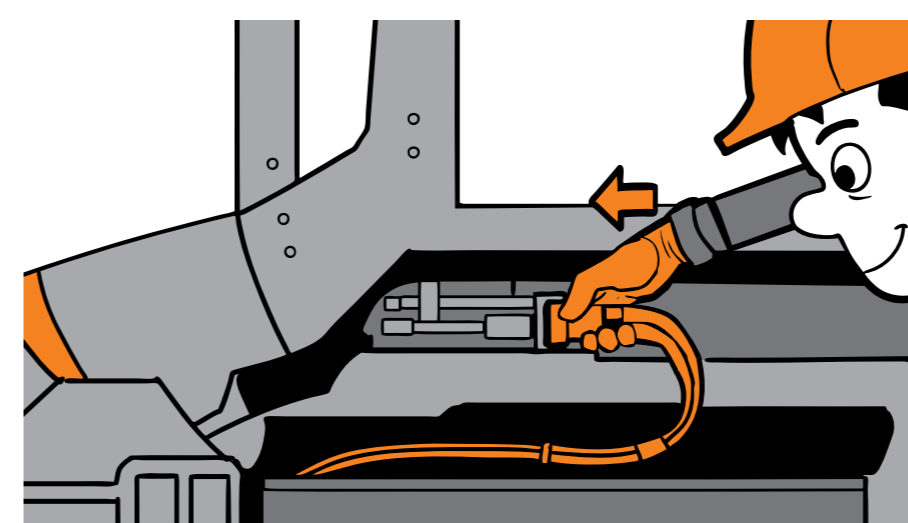

Store the battery cable correctly

Correctly store the battery cable to ensure a long service life.

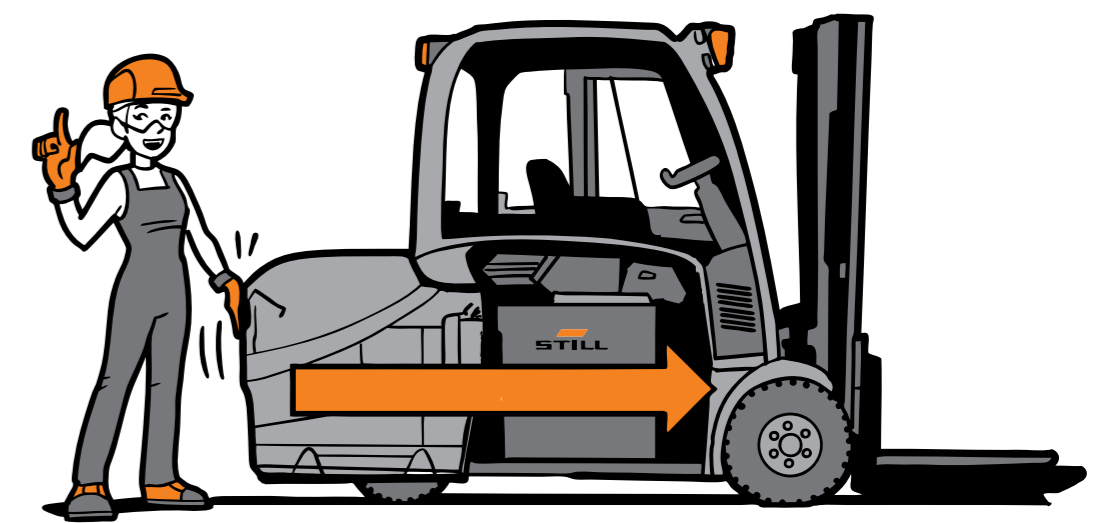

Check the water level

If necessary, top up with distilled water but avoid overfilling.

Reconnect battery to truck

Close battery cover
